EV News

Ten States Reach Goal to Put 3.3 Million Electric Vehicles on the Road by 2025

In a report released today, NESCAUM announced that an ambitious goal set in 2013 to advance electric vehicles (EVs) has just been achieved. In a memorandum of understanding (MOU) signed by ten state governors, a collective target was set to put 3.3 million electric vehicles on their roads by 2025. Based on NESCAUM's analysis of the data, over 3.3 million electric cars have been registered in these states as of December 31, 2024 – meeting and even exceeding the target on time. In 2013, there were only 87,506 electric vehicles in these ten states.

EVs Hit Record Market Share in January

Americans bought 102,243 electric vehicles (EVs) in January, according to Kelley Blue Book parent company Cox Automotive. That's a 23% drop from December's numbers, but a January drop is normal, as new car sales peak every December.

Perhaps a more telling statistic — January's EV sales figure is nearly 30% higher than the number that Americans

bought last January.
