Curious How Many EVs Are In Your Neighborhood?

Thousands of Long Islanders are already driving electric—and the numbers keep climbing. Explore how EV ownership is spreading across neighborhoods and towns. As more residents make the switch, we're building momentum toward a cleaner, more affordable transportation future for everyone.

Check out how many EVs are on the road in your community [HERE!](#)

EV 101

BABYLON PUBLIC LIBRARY

**MONDAY,
MARCH 16TH
6PM TO 7PM**

Learn the basics about electric vehicles and charging, and get the chance to speak with current EV owners about why they went electric and what it's really like to drive one.

24 SOUTH CARLL AVE, BABYLON, NY 11702

Join us for an EV 101 at Babylon Public Library on Monday, March 16, 2026 from 6 PM - 7 PM.

Come learn the history of electric vehicles, EV basics, cost savings, environmental considerations, EV charging basics, available incentives, common myths and misperceptions, and resources available to continue learning. Plus, connect with current EV owners to find out what it's really like to own and drive one. Several electric cars will be available on site if you'd like to take a look.

You can register [HERE](#).

EV 101

Town of Hempstead:
Department of Conservation and
Waterways

Learn the basics about electric vehicles and charging, and get the chance to speak with current EV owners about why they went electric and what it's really like to drive one.

**MON, MARCH 30TH
6:30 PM - 7:30 PM**

**1401 LIDO BLVD
POINT LOOKOUT,
NY 11569**

Curious about electric vehicles? Join us for EV 101 at the Town of Hempstead Conservation & Waterways Administration Building.

Learn the history of EVs, how they work, cost savings, charging basics, available incentives, and the environmental benefits of driving electric. We'll also clear up common myths and share resources to help you continue exploring.

You'll even have the chance to connect with current EV owners and see several electric vehicles on site.

Celebrating Earth Month

Patchogue EV and Sustainability Fair

Saturday, April 11, 2026

11 - 2 pm

(Rain date: April 18, 2026, 11-2pm)

Patchogue LIRR station parking lot

Sponsors: Village of Patchogue; Drive Electric Long Island

- **Ribbon cutting** for new solar carport array and EV charging stations at the Patchogue LIRR station.
- **EV Showcase** with a variety of full electric and plug-in hybrid electric vehicles on display. Residents with EVs are also encouraged to show off their EVs.
- **Vendor tables** featuring information on EVs and other sustainability vendors and non-profits.
- **Family entertainment** and activities.

[Drive Electric Long Island In the Community](#)

We met up with Drive Electric Long Island volunteer Michael Pitzer at Eisenhower Park to talk about the perks of driving an EV on Long Island.

From lower fuel and maintenance costs to local rebates and expanding charging access, he shared why going electric just makes sense here. He also loves the performance of his Chevy Bolt — the instant torque and smooth acceleration make it easy to navigate Long Island traffic and merge confidently onto parkways.

You can subscribe to our Youtube Channel [here](#).

EV News

The used EV resurgence is coming—and that's great news for consumers and the climate

Headlines across the auto industry have lately painted a familiar story: demand for new electric vehicles is cooling. With federal incentives gone and pricing still volatile, it's easy to misconstrue short-term bumps as long-term stalling. But beneath the surface of new-car sales lies a far more compelling truth, one that holds enormous opportunity for everyday Americans and for the climate alike.

Long Island continues to drive surge in electric vehicles

Despite the end of federal tax credits for the purchase of electric vehicles, Long Island has seen an increase in EV ownership over the last year.

There was a 23 percent rise in EV registrations here in 2025, pushing the number of EVs on the roads of Nassau and Suffolk counties to over 87,000, according to a new report from Drive Electric Long Island.

Here's How Much Range EVs Really Lose After 150,000 Miles

Battery degradation on high-mileage EVs is not as big a deal as some might make you believe.

Real-world data shows that EVs with over 150,000 miles are still going strong, with minimal degradation.
