[The Hub for EV Savings on Long Island!](#)

This Earth month is the perfect time to rethink the way we move. Long Island drivers can now discover current incentives, exclusive offers, and partner promotions on electric vehicles all in one convenient place. Whether you're ready to purchase your first EV or simply beginning to explore your options, the Deals Hub brings together the best local opportunities to help you choose a smarter, cleaner way to drive.

Best of all, the Deals Hub is updated monthly, so you can keep coming back to discover new savings, limited-time offers, and the latest EV incentives available on Long Island.

Click [HERE](#) to visit the Deals Hub on our website.

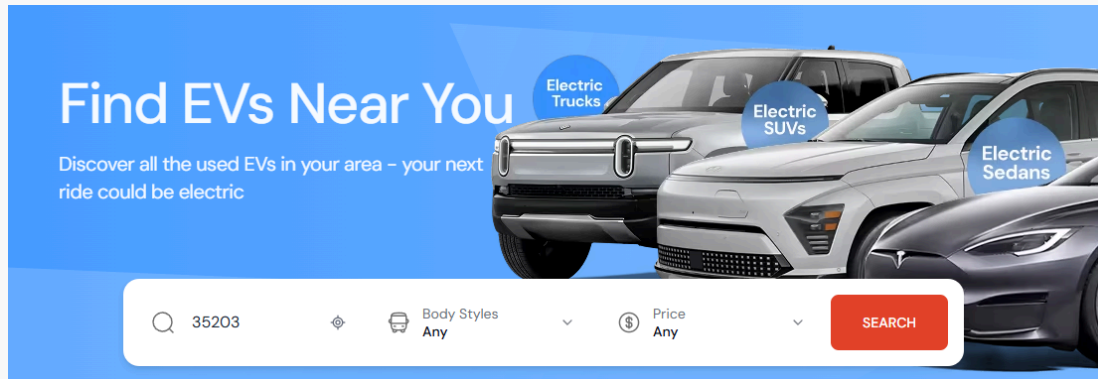

The 2026 State of Electric Vehicles on Long Island Report has officially arrived.

Inside, you'll find the latest data and insights on EV adoption across Long Island towns, trends in local EV usage, top EV dealers, charging infrastructure growth, and a comprehensive overview of available rebates and incentives.

Whether you are just starting your research or ready to take the next step, these sessions are designed to help you feel confident about going electric.

[Drive Electric Long Island In the Community](#)

Drive Electric Long Island participated in the Herald Senior Health and Beyond Expo in East Meadow on March 13th, where we connected with an enthusiastic group of attendees interested in learning more about electric vehicles. Many were excited to discover how convenient EV ownership can be, especially the ability to charge at home and avoid frequent trips to the gas station.

Cost savings were a key point of interest, as EVs can help reduce both fueling and maintenance expenses, an important consideration for those on a fixed budget. For many attendees, the event provided a helpful introduction to EV basics and the benefits of making the switch to electric.

Get up to \$400 off a Residential Charger from PSEG LI

Qualified PSEG Long Island customers can receive a \$100 rebate off a qualified Level 2 EV charger. Customers located in Disadvantaged Communities (DAC) and on our Household Assistance Program can receive an additional \$300 – totaling \$400 in rebates. An interactive map of designated Disadvantaged Communities can be found [here](#).

Click [HERE](#) for information on how to apply.

EV News

Two Other Uses for Electric Vehicles Besides Driving: Backup Power and Grid Support

In principle, electric vehicles can do more than backup power V2H and off-grid V2L. Drivers with a properly equipped electric vehicle and home set-up have the option to use their vehicles routinely in coordination with electricity grid needs to lower their electricity bills through bill credits or incentives.

A solid-state EV battery that can achieve 800 miles of driving range — It's becoming a reality

Solid-state batteries are called the “holy grail” of EV battery tech for a reason, right? The new battery tech is quickly moving from the lab to the real world, with some claiming to unlock over 800 miles of driving range.
